A Worldwide Leader in Commercial Laundry

**INDUSTRIAL
BY DESIGN**

At IPSO, laundry is all we do. We've been Europe's premier laundry manufacturer for over 40 years. In that time, we've developed a reputation for reliability, quality and efficiency.

What that means for you is more products, more services and more effective solutions – for virtually every market and segment of the business.

SUPPORT LEADS TO SUCCESS

IPSO is backed by the strength of our parent company, Alliance Laundry Systems LLC – the world's largest manufacturer of commercial laundry products and provider of services for laundromats, multi-housing and on-premises laundries. Our commitment of putting the customer first drives our commercial quality product development strategy, marketing programs and technical support. That is Customer One.

A WORLDWIDE NETWORK OF TRUSTED PARTNERS

IPSO combines global skills with local expertise through a worldwide network of 100 partners in over 90 countries across the globe. The 'IPSO Growth Incentive Program' (IGIP) is a further step toward an even better relationship with our partners in a way that rewards them too. The more IPSO products they sell, the more money they receive in an annual marketing budget to grow their business even more.

COMMITTED TO QUALITY

The engineers at IPSO are committed to producing the best industrial equipment on the market. Although attractive designs and ergonomics are important, we care most about how well our machines perform. Our mission is to make the most rugged, long lasting and reliable washer-extractors, tumble dryers, ironers and auxiliary equipment. You won't see any low quality parts on our equipment. Each piece is rock-solid, handling even the toughest jobs.

IPSO
GR  **WTH**
GROWTH
INCENTIVE
PROGRAM

INDUSTRIAL
BY DESIGN

Few businesses or investment options can match the 25 to 35 percent or more ROI that a coin laundry can produce. As a recession-resistant investment, a coin laundry is virtually immune from downswings in the economy. In addition, this proven business model requires very little management, evidenced by the coin laundry being a secondary income source for most owners. A fixed cost structure, cash payment upfront for service and no franchise fees all further contribute to the attractiveness of coin laundries for investors. And with the increasing renter population (a key customer base) and the time savings coin laundries offer versus doing laundry in small capacity home equipment, coin laundries will be a growing business for the foreseeable future.

IPSO has been the driving force behind some of the most profitable coin laundries for years. The IPSO washer-extractors, tumble dryers and flatwork ironers are designed for efficient use of utilities, while providing superior quality and performance. Coin laundry owners choose IPSO products for their value price, profit potential, ease of use and durability, while coin laundry customers appreciate IPSO equipment's user-friendly controls and the excellent finished quality they provide.

HD

Soft-mount washer-extractors

IPSO's HD-line washer-extractors are industrial by design. They are built to extend linen life and reduce water usage and utility costs, and maximize productivity. The heavy-duty construction provides reliable operation and assures your HD washer-extractor will be in service for years to come.

The high G-Force extraction on the HD-range reduces drying times and utility costs, often removing such significant moisture that items can often bypass the dryer and go directly to your flatwork ironer.

The HD-line of washers feature the advanced Cygnus controls, improved design for easier installation and maintenance and a redesigned frame that's even stronger than before.

FEATURES & BENEFITS

- The frame, cabinet and suspension system have been designed to perform continuously in the highly industrial environment.
- All vital parts have undergone extensive lifecycle testing to ensure the design will endure even in the harshest environments.
- After extensive research & testing, the standard wash programs have been optimized in order to reduce water, detergent and energy consumption. The result is a saving of 25 percent, all without sacrificing wash performance.
- The easy-to-use Cygnus controls lead the market as the most comprehensive controls in the industry. Cygnus controls give you the ability to modify every parameter of the wash cycle, all from the convenience of a PC or laptop.
- The large door enables quick loading and unloading of the linen. The door handle and door lock ensure a smooth opening and closing of the door, resulting in an increased reliability and safety.
- The drain valve is mounted under the tub to reduce water consumption to a minimum. This results in a faster and easier drain of water in an industrial environment.
- The high extraction speeds considerably reduce drying time, resulting in energy & time savings in the drying process.

OPERATION

- Electronic coin meter
- Mechanical coin meter (single or double)
- Central Pay

AVAILABLE MODELS

HD 60 - HD 65 - HD 75 - HD 100 - HD 135
HD 165

AVAILABLE CONTROLS

CYGNUS PREMIUM COIN

Extensive control with large LCD-display showing an overview of the wash program by means of easy understandable symbols. Cygnus Premium enables the user to adjust parameters of wash programs on the machine.

CYGNUS COMMERCIAL COIN

Flexible control featuring up to 60 freely programmable programs for COIN and containing extra functions (hold, soak, adjustable final spin, predefined start, rapid advance function).

CYGNUS STANDARD COIN

Flexible control featuring 7 standard wash programmes for COIN and offering limited indication of functions during the wash cycle.

WD

Hard-mount washer-extractors

Hard-mount washer-extractors are secured to the concrete floor, cost significantly less than their soft-mount counterparts and have a proven record of reliability with superior wash results.

IPSO's WD-line hard-mount washers are industrial by design. They are built to extend linen life, reduce water usage and utility costs, and maximize productivity. The heavy-duty construction provides reliable operation and assures your WD washer-extractor will be in service for years to come.

The G-Force extraction on the WD-range reduces more water from each load, reducing energy costs and shortening drying times. The WD-line of washers feature the advanced Cygnus controls, improved design for easier installation and maintenance and a redesigned frame that's even stronger than before.

FEATURES & BENEFITS

- The frame & cabinet have been designed to perform continuously in the highly industrial environment.
- All vital parts have undergone extensive lifecycle testing to ensure the design will endure even in the harshest environments.

AVAILABLE MODELS

WD 65 - WD 75 - WD 100 - WD 135 - WD 150
WD 165 - WD 185

AVAILABLE CONTROLS

CYGNUS PREMIUM COIN

Extensive control with large LCD-display showing an overview of the wash program by means of easy understandable symbols. Cygnus Premium enables the user to adjust parameters of wash programs on the machine.

CYGNUS COMMERCIAL COIN

Flexible control featuring up to 60 freely programmable programs for COIN and containing extra functions (hold, soak, adjustable final spin, predefined start, rapid advance function).

CYGNUS STANDARD COIN

Flexible control featuring 7 standard wash programmes for COIN and offering limited indication of functions during the wash cycle.

DR

Tumble Dryers

The DR-range of tumble dryers feature a concentrated airflow pattern and sealed cylinder rims to ensure maximum air utilization and energy savings. This superior drying performance helps laundries maximize throughput.

The DR tumble dryers are designed with fewer moving parts which creates less wear and tear. We make it even easier with a large, easy-to-clean lint compartment and a heavy-duty door hinge designed to withstand heavy usage.

FEATURES & BENEFITS

- A large, self-cleaning lint screen means less cleaning and ensures efficient operation. Self-adjusting belts save time and reduce maintenance costs.
- Tumblers in vended laundries receive their share of heavy-use abuse. IPSO's rugged design and heavy-duty door and hinge can take whatever your staff dishes out.
- IPSO tumblers perfectly balance heat, airflow and cylinder design, which translates into the most efficient drying process. That means utility costs are kept low.

OPERATION

- Electronic coin meter
- Mechanical coin meter (single or double)
- Central Pay

AVAILABLE MODELS

Single models:

DR25 - DR30 - DR35 - DR50 - DR55S - DR75

Stacked models :

DR335 - DR445

AVAILABLE CONTROLS

DX4

Flexible microprocessor with 3 freely adaptable programs. Easy programming of temperature, drying times and cool down-times.

CI

Flatwork Ironers

The CI-range of ironers features models with a roller diameter of 325 mm. These ironers offer the most flexible programming options in order to ensure you the lowest energy consumptions whilst maintaining top ironing quality.

OPERATION

- Electronic coin meter
- Mechanical coin meter (single or double)
- Central Pay

AVAILABLE MODELS

Cylinder heated models:
CI1650/325 - CI2050/325

AVAILABLE CONTROLS

MICROPROCESSOR CONTROL

This control allows an efficient operation of your ironer. Ironing speed and temperature can easily be regulated.

CW8 - CD8 - CS8

Semi-commercial equipment

The CW8-washers are highly efficient, reducing operating costs through low water usage, using as little as 41.3 litres per cycle, a saving of more than 40% compared to commercial top load washers. A 1,000 RPM spin speed increases overall laundry efficiency by removing more moisture from loads. Less moisture translates into reduced drying times. Fast cycle times get the job done quickly, while the double load washtub provides lots of room for larger loads.

The IPSO CD8-dryers are designed to suit your laundry's specific needs as they feature a large, easy-to-clean lint compartment and a reversible door to accommodate your laundry layout. The large door opening is the largest in the industry on this type of equipment, providing easy loading and unloading.

The range of CS8-stack washer/dryers has been designed as vertical combinations that provide all of the power of IPSO washers and dryers while occupying only half of the floor space of a conventional washer and dryer setup. These stacked units also allow to utilize the same connections and hook-ups required by a standard washer and dryer, so no changes to your installation are needed.

OPERATION

- Electronic coin meter
- Mechanical coin meter (single or double)
- Central Pay

AVAILABLE MODELS

CW8 - CD8 - CS8

AVAILABLE CONTROLS

MICRO-DISPLAY

Our Micro-Display Control keeps users informed throughout the wash process with cycle status lights and a digital cycle countdown. It is possible to modify the six standard wash programs by means of cycle modifiers. The control also offers five drying cycle selections, and basic audit features.
